EDUCATION

Amal Jyothi College of Engineering (Autonomous)

Bachelor of Technology/Engineering, Information Technology

Kerala, India

July 2022 – June 2026

EXPERIENCE

CTO | Co-Founder

Zypher Software Solutions

January 2026 – Present

Kerala, India

- Co-founded and led a 10-member team shipping 20+ client products & designs across web, mobile, and AI.
- Architected solutions spanning React, Next.js, Flutter, FastAPI, PostgreSQL, & AI automation for global clients.
- Directed delivery and client engagements alongside full-time engineering work, driving INR 18.7L+ in revenue.

Full-Stack Developer Intern

PeopleMaketh

July 2025 – July 2026

Bengaluru, India (Remote)

- Led AI DevSecOps backend architecture, automating LLM triage to improve code checks by 60%.
- Decoupled asynchronous APIs and PostgreSQL schemas, handling 5K+ daily requests across 200+ assets.
- Built automated pipelines & backend ChatOps webhooks via Slack, accelerating deployment workflows by 40%.

Software Engineer Intern

LyLux Lighting Equipment Trading LLC

July 2025 – December 2025

Dubai, UAE (Hybrid)

- Developed centralized schemas & APIs to manage 400+ lighting products and 50+ configurable variants.
- Automated backend data pipelines for catalog creation and publishing, reducing manual entry time by 70%.
- Implemented bulk-edit batch processing and data validation APIs, improving data accuracy and efficiency by 55%.
- Built a custom CRM platform with 20+ REST APIs, optimized PostgreSQL schemas, streamlining BO by 60%.

PROJECTS

SecureThreadOPS - VMS | *Python, FastAPI, React, PostgreSQL, Docker*

July 2025 – Present

- Architected asynchronous APIs managing 5000+ vulnerabilities across 200+ assets, eliminating system timeouts.
- Optimized database schemas & implemented risk-based scoring, cutting manual review by 60%.
- Decoupled LLM scanners from main thread via BG services, boosting detection accuracy by 45% under load.

CareerWise | *React, Node.js, PostgreSQL, Neo4j, Redis*

May 2025 – Present

- Developed a Node.js backend for a career guidance platform, scaling API traffic across a 3-college pilot.
- Engineered a Neo4j graph engine for live career roadmaps, cutting multi-variable college query latency to <50ms.
- Decoupled NLP-driven ATS resume generation into background workers, driving 90% positive user feedback.

HASH - AI-Powered Learning Platform | *Python, FastAPI, React, PostgreSQL*

Nov. 2024 – Mar. 2025

- Architected a multi-tenant API with strict RBAC, securely routing concurrent data for 200+ users.
- Engineered an LLM grading pipeline via structured JSON, eliminating manual evaluation for a 2-semester pilot.
- Built a PostgreSQL gamification ledger with API event triggers, automating reward redemptions for 10+ students.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Dart, Java, C, PHP, SQL, R

Frameworks/Tools: FastAPI, React, Node.js, Express.js, Flutter, Tailwind, Django, Flask

Databases: MySQL, MongoDB, PostgreSQL, Supabase, Redis

Dev Tools: Git, GitHub Actions, Postman, Figma, Adobe Suite, Blender, n8n, Docker, Nginx, Kubernetes, VMWare

CERTIFICATIONS

Coursera: Google – Data Analysis with R; **AWS** – Generative AI with LLMs; **IBM** – Python for Data Sci. & AI

NPTEL: Cloud Computing Fundamentals — **IIT Kharagpur:** Artificial Intelligence with Python

ADDITIONAL INFORMATION

Achievements: 1x Global Hackathon Runner-up | 2x National Hackathon Runner-up | 3x College/State Hackathon Runner Up | 3+ Years - Freelancing Experience (Design & Development) | Research Paper "Integrating AI-Powered Security into the SDLC" - Published to IEEE & AICERA

Languages: English, Hindi, Malayalam (Native), Basic: Arabic, Tamil
